

NYRA's Point of Sale (POS) solution - has been developed and deployed at various customers since last 1990's and it is known for its package of hardware and application durability, but yet cost efficient to be implemented. Its features are simple to navigate and very convenient to used. It is also well known for its rapid development time for custom applications.

We also provides incisive consultation with up to date features, such as GPN Acquiring System, QRIS Payment, Laku Pandai & miniATM.
